B2600 – HP Workstation

Again and again we talk to companies who have one thing in common:
They do have a HP B2600 workstations in use, because they are bound by a software that runs under HP-UX 10.2.
The B2600 is often the only certified workstation for their software.
In addition to complete workstations, companies are also looking for spares, such as fans, power supplies or motherboards. security is, as you can imagine, also an important aspect, where we maintain warranty and repairs.

HP itself has discontinued the support for these workstations a longer time ago.

This PDF file was made, to give you an overview, about what can be done.
We would be pleased, if you would find a suitable solution for your workstation in this file.

B2600 – HP Workstation

B2600   Workstation, 500 MHz PA RISC 8600
                   Can be configured at buyer's option
   cleaned, tested, with 90 days warranty   **EUR** depends on config.

For a long-term and stable solution we essentially recommend the following additional option:

B2600-allNEW - thorough cleaning of the B2600
                 - replace all fans (includes processor fan and power supply fan)
                   We use industrial fans for long life
                 - all contacts will be inspected, cleanded and treated against corrosion.
                 - the realtime clock will be replaced by a new one (new lithium battery)
                 - unused power supply for B2600 „industry grade"
                   100,000 mtbf, as perfect replacement for HP0950-4051, with identical dimensions,
                   identical performance and specs and fully compatible.
                 - You will get a new hard disk, suitable for your requirements and additional
                   a new DVD built in.
                   1 Year STCS Warranty   **EUR 1.880,00***

The B2600-allNEW option can also be ordered separately, and applied to your existing B2600. Therefore you should send a working workstation to us.

Some parts of the above option are also available separately.
Take a closer look at the next pages.
